01. PROFILE

I have been programming since 1999 and working as a developer since 2004: first websites as a freelancer under the SN.DESIGN brand, since 2011 full-stack development at ACCA software S.p.A., where I also lead the web team.

Open source is my passion: I maintain about ten Angular and Node.js libraries published on npm - 96,000+ downloads per month - including Fulmine.js, the third fastest framework on HttpArena and the first among the JavaScript ones. I contributed pull requests to Node.js core and to Angular, I was a WordPress core contributor (5.5) and I am the author of the «Speed Up» plugin series. I write about Angular, Node.js and performance on DEV Community.

02. EXPERIENCE

2011 – present **Full-Stack Developer and Tech Lead** · ACCA software S.p.A.
Angular and TypeScript web applications: architecture, shared libraries, loading and rendering performance. Node.js and Delphi back-end on PostgreSQL. I lead the web team with code review, code standards and mentoring. I use AI coding agents every day.

2010 – 2011 **Web developer** · Estrogeni srl
Front-end and back-end for the clients of a communication and marketing agency in Rome.

2009 – 2010 **IT lab teacher** · ITI Sarrocchi
Lessons and exercises in the school labs, in Siena.

2004 – 2011 **Freelance web developer** · SN.DESIGN
Websites built on my own, from the first concept to the final development.

03. EDUCATION

2003 – 2008 **Degree in Communication Sciences** · Università degli Studi di Salerno
Audiovisual communication and multimedia processing.

04. SKILLS

Frontend	Angular, TypeScript, JavaScript, RxJS, Signals, HTML5, CSS / SCSS
Backend	Node.js, Express, PHP, Symfony
Database	PostgreSQL, SQL Server, MySQL, MongoDB, Elasticsearch
Servers & DevOps	nginx, Apache, Redis, CDN, Docker, Git, GitLab CI/CD
Testing	Vitest, Jest, Playwright, Cypress
Other	Web Performance, AI coding agents, MCP, WebMCP, WordPress, SEO, Accessibility, Open Source

05. OPEN SOURCE

12 npm packages, 96,584 downloads per month.

ng-let

Structural directive to declare local variables in HTML templates.

★ 47 · 69,230 downloads/month

ng-http-caching

Cache for HTTP requests in Angular applications.

★ 54 · 13,607 downloads/month

ng-generic-pipe

Generic pipe to use component methods inside the template.

★ 21 · 5,658 downloads/month

ng-as

Pipe and directive for type casting template variables.

★ 9 · 3,269 downloads/month

fulmine.js

Express 5 compatible HTTP server built on uWebSockets.js: up to 20× faster.

★ 24 · 2,632 downloads/month

ng-simple-state

Simple state management for Angular, with just Services and Signal. Supports WebMCP.

★ 46 · 859 downloads/month

06. OPEN SOURCE CONTRIBUTIONS

422 merged pull requests in 39 projects of other people, including:

nodejs/node ★ 122K

- src: keep ALS store in AsyncResource::MakeCallback #66326
- src: avoid env lookups and a global handle in InternalCallbackScope #66316

angular/angular ★ 101K

- refactor(core): make the animate.enter and animate.leave runtime tree-shakable #70991

uNetworking/uWebSockets ★ 19K

- Accept the asterisk form for OPTIONS #1952
- Answer 400 to a request target that is not visible ASCII #1951
- Skip trailer fields after the last chunk, and answer 400 to a bare LF in them #1950
- Reject a Host header with a path, a query or a fragment #1949

brianc/node-postgres ★ 13K

- fix(pg): run a named statement with an empty text more than once #3781
- fix(pg): expose detail and hint on errors from the native client #3780
- fix: reject portal based queries in pipeline mode instead of TypeError #3737
- fix: fail pipelined queries when the connection dies instead of hanging #3736
- perf: cache parsers per column #3568

uNetworking/uWebSockets.js ★ 9.2K

- NativeString: read the thread-local pool once per instance #1353
- Measure a two-byte string first when it may not fit in the pool #1339
- Never give the end of a full pool to an empty string #1338
- Skip the first write when a string has more characters than free pool bytes #1337
- Write strings to utf-8 in one pass, straight into the pool #1335

fastify/fast-json-stringify ★ 3.7K

- fix: escape property names in the schema refs the generated code validates against #882
- perf: short array and object #817
- perf: cache json strings into const #713
- fix: make asString monomorphic and trigger V8 optimization #689
- feat: unsafe string format #686

dimdenGD/ultimate-express ★ 1.1K

- fix: answer 413 for a body over the limit, as body-parser and finalhandler #375
- fix: stop body parsers from responding twice to an oversized body #356
- perf: skip full headers build in req.fresh when no conditional headers #355
- perf: remove per-request async overhead in router dispatch #354
- fix: uws exclusive port #305
